TIMELINE

Loaded	Oct 19, 8:14 AM
Left origin	8:42 AM
Arrived destination	8:59 AM
Unloaded	9:37 AM
Completed	9:37 AM

How this is measured. Arrived and departed are when the truck's GPS entered and left each site's geofence; loaded and unloaded are the driver's status changes in the app. Time on location is the full time at both sites. The route, miles, breakdown and timeline cover load to unload, with GPS jumps filtered out. Idle is a stop of 5+ minutes away from a site. Times are MDT (UTC-06:00).
